## Cedar Hive Stand Assembly Instructions (10 Frame/8 Frame)

Hive Stand materials (see fig. 1):

A-Two pre-built leg assemblies

B-Two pre-drilled side rails

C-Hardware package

You will also need:

A 7/16" socket wrench

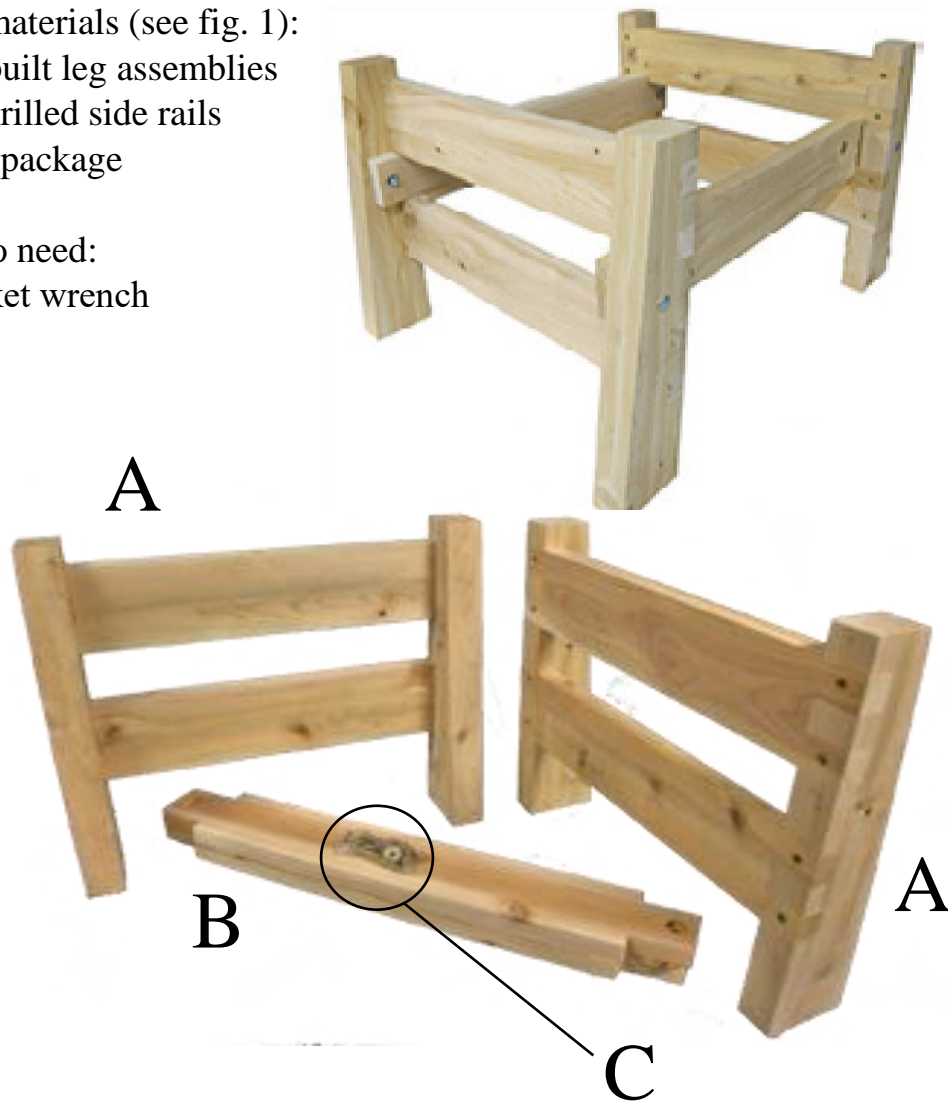

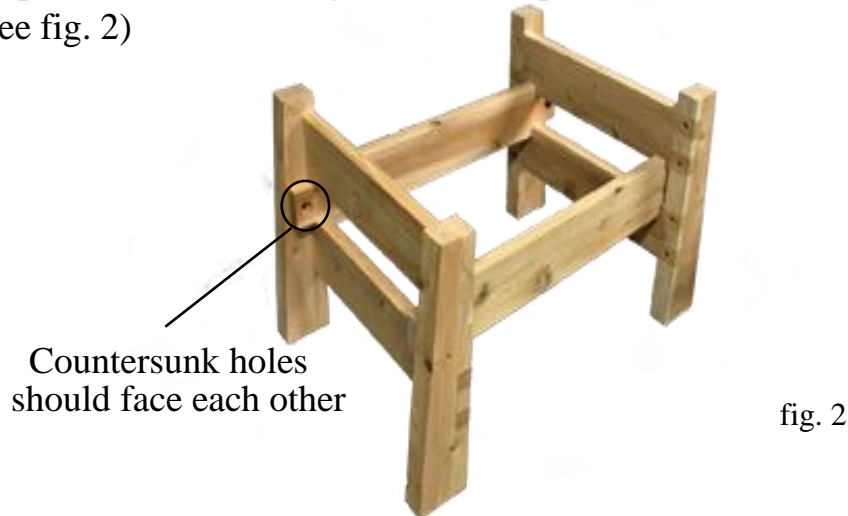

fig. 1

Step 1: Stand the two leg assemblies (piece A) with the flat edges facing each other. (see fig. 2)

Step 2: Slide the side rails (piece B) in between the horizontal slats of the leg assemblies (piece A) with the countersunk holes facing each other. (see fig. 2)

Step 3: Thread the bolts through the pre-drilled holes on outside of leg assemblies and the side rails (See fig. 3). Slide on the washer and nut on the other side and tighten with a socket wrench. Repeat on all four corners.
